

OUR QUALITY POLICY

1

“XENOL” constantly acts in line with quality, sustainable environment and occupational health / safety in its work. We aim to keep customer satisfaction at the highest levels in order to be at the top of our industry. As “XENOL”, we meet the requirements of the ISO 9001 Quality Management System in order to increase our quality performance in all our processes, and we are committed to continuous improvement by providing the necessary resources.

2

Occupational health and safety of our work comes first for us. We both improve our employees and aim for quality in our services by providing continuous training to our employees, whether in occupational health, safety and environment, or quality and testing activities.

3

We identify our environmental impacts, analyze their impacts, and aim to reduce our impact on the environment to the optimum level.

4

With the process management philosophy, we keep our other processes under control, as well as production, testing, sales and customer satisfaction.

5

We carry out experiments using the best technological test equipment, in accordance with test methods and standards, by demonstrating good professional practices with our expert staff who are constantly trained in their fields and know their target.

6

We continue our work according to current national and/or international standards or defined test methods, by providing the most up-to-date and validated technical application conditions, in optimum time and at optimum cost, based on impartiality, independence, honesty, confidentiality, reliability and legal conditions.

7

We work in accordance with the policies and procedures prepared in accordance with the conditions of the TS EN ISO/IEC 17025 standard, and we undertake that the laboratory management will comply with the TS EN ISO/IEC 17025 standard and carry out the necessary work to continuously improve its effectiveness.
